

Success Story >> >> Office and Commercial Building

Location/Building : Kenya Commercial and Office Building | Country/City : Nairobi / Kenya
Market/Industry : Office and Commercial | Related Products : D3622TIR

CBC

Background

CBC is a newly constructed commercial and office building located in one of the busiest streets in Nairobi, Kenya. This new commercial and office building is one of the most modern building in Kenya and the security guards look for high definition surveillance solution to secure its premises.

Solutions

High definition surveillance is requested; therefore, GKB proposed GKB D3622TIR (Vandal Proof IR H.264 1.3MP IP cam) for this project. This project requires 25 * HD IP cams to secure its premises.

GKB also supplied NVR10 software, a network video recording software, which the local Kenya partner can install it to a server. The software is capable of recording up to 64 * GKB 3622TIR cameras @ SXGA (1280 * 1024) resolution with 15fps resolution and quality. As a result, if the building requires more cameras in the future, there is no need to buy extra license.

NVR10 software also has AVI video conversion and Snapshot (Single/Multiple channel) function; therefore, the security guards can save the event video and image for backup.

Benefits

Using GKB Diplomat solution is very economical. The free NVR10 recording software allows end users to achieve high definition surveillance solution with minimum investment in recording and storage.
