Location/Building : Huaku V5 Commercial and Office Building | Country/City : Taipei / Taiwan
Market/Industry : Office and Commercial | Related Products : GKB D02, D6122, D3622TIR

Huaku V5

Background

Huaku V5 is an office and commercial combo building located in Neihu District, Taipei City. It was constructed in 2010 and it was sold and leased to business and commercial companies. It has total 13 stories above ground with 4 basement floors. V5 looks for HD definition surveillance network camera solution to secure its premises.

Solutions

High definition surveillance is requested, therefore, GKB proposed its D02 (Indoor H.264 1.3MP IP cam), D6122 (Outdoor IR H.264 1.3MP IP cam), and D3622TIR (Vandal Proof IR H.264 1.3MP IP cam) for this project. This project requires 80 * HD IP cams to secure its premises.

Free NVR10 software is also supplied. The security guards in Huaku V5 divided 80 HD IP cams into 5 server stations. Each sever station is with GKB NVR10 for recording and monitoring purpose. NVR10 allows to each server to record up to 64 * 1.3MP IP cams as well as 16 channel playback simultaneously. Intelligent search/playback functions such as missing object, foreign objects, and event detect help security guards to retrieve evented related video more efficiently.

NVR10 software also has AVI video conversion and Snapshot (Single/Multiple channel) function; therefore, the security guards can save the event video and image for backup.

Benefits

Using GKB Diplomat solution is very economical. Although GKB NVR10 is a free 64CH NVR software, its powerful features fulfill all security requests of V5 security guards. Even in future expansion of HD security cameras, there will be no extra software license fee.
