

Success Story >>  >> The Link Building

GKB IP Solution Deployed to Safeguard the Commercial Building in Cebu

Background

“The Link”, built in 2013, is a 22-storey commercial building for business process outsourcing (BPO) building located in Cebu IT Park, Philippines. The Link was looking for high definition surveillance system to protect its tenants including IT companies, insurance companies, and banks in the building.

Solutions

A total of 45 IP Dome cameras have been installed in “The Link” building, they monitor the elevators, lobby, main exits, offices, public places and parking lot. Each camera has an embedded 16G Micro SD card for back up recording in case of network failure.

GKB D34624

GKB’s IP solution is a server and client structure that allows “The Link” to set multiple monitors and most importantly makes possible that live view function doesn't interfere with the recording server and system.

The operation of the entire system is managed and coordinated centrally with “Viewer 11 & NVR Server,” two comprehensive and intelligent security platform software.

GKB Envoy™ Viewer11

Benefits

The entire solution resulted in a wealth of benefits:

● **A Flexible and Cost-Effective Solution**

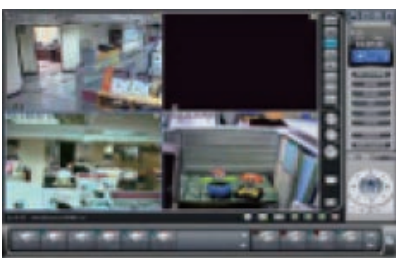

When the system was designed, the idea of expansion was thoroughly considered. The result is that new cameras can be easily added without any license fee becoming an excellent return on investment.

● **Clear and Clever Monitoring and Management**

Cloud NVR can remotely monitor and manage cameras from any device. Log in is as simple as entering your username and password. “The Link” can now remotely manage IP cameras easier than ever.
