

Success Story >>  >> Chiang Mai University**GKB IP Solutions Improve University CMU to Implement a Campus-Wide Security Plan to Create a Safe Learning Environment in Thailand****Background**

The tendency of young people to commit crimes on campus has hugely increased in recent years. Schools should be a safe place for education. Based on this belief, governments around the world enact laws in support of security surveillance installation on campus to improve security.

National Chiang Mai University (CMU) was founded in January 1964, under a Royal Charter granted by his majesty King Bhumibol Adulyadej. CMU was the first institution of higher education in the north, and the first provincial university in Thailand.

To protect staff and students' safety in the vast campus, the board of CMU decided to implement effective and flexible video surveillance and key tag attendance system all together. The system is sophisticated designed and commissioned by GKB's local System Integrator, which system sufficiently increased the security level and staff efficiency.

**Solutions**

So far, CMU has installed 32 GKB D3824 IP cameras with 720MP to monitor all hallways, public areas and every faculty of CMU's 24 hours in a day, and planed to add up more GKB cameras this year. Additionally, GKB highly-compatible-solution is ideal to integrate a customized device that able to analyze the attendance in the main gate, helping the security guards watch out the access of its campuses entrance. GKB IP video surveillance is also more efficient information sharing with its free-charge-of software and open platform: Envoy NVR 10, viewer 11 and Cloud NVR.

Benefits

- GKB IP surveillance system is easy and cost-effective expansion as needs grow. With GKB Cloud platform and Envoy management software capabilities, the GKB IP Solution has enabled the CMU to expend the further security plan to leverage its existing network infrastructure to save on installation and maintenance costs.
- GKB has improved school security through its superior image quality, situational awareness, and easier integration with other security devices. By integrating surveillance with an access control, CMU security guards are better coordinated responses that can save the lives of students, staff, and emergency response personnel.
