

Makkah Chamber Deploys GKB Superior IP Solution

Background

Makkah Chamber of Commerce and Industry (MCCI) is a chamber of commerce located in the city of Makkah in the country of Saudi Arabia. For the property and staff safety, Makkah Chamber is looking for reliable and high performance IP-based security system with affordable price. GKB IP solution is able to offer the excellent image quality and cost-effective package to reach Makkah Chamber's high-standard priorities.

Solutions

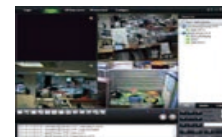

GKB proposed 30pcs vandal-proof dome cameras (D34724) and 8-bay standalone NVR server to Makkah Chamber. GKB vandal-proof domes were installed on the ceiling of the building, monitoring daily operation and recording the video for the security issue.

GKB's reliable dome-style camera D34724 is made of vandal resistant material, making the camera difficult to be destroyed. In addition, GKB 8-bay standalone NVR server is an advanced server which can record up to 48 HD cameras at the same time. Furthermore, GKB provides client value-added software "Viewer11" which can authorize access to standalone NVR.

Benefits

- After implementation of GKB IP solution, the remarkable performance improves the security level of both Makkah Chamber's indoor and outdoor environments.
- Using GKB IP solution is ideal to minimize the budget in the future due to our product's high capability of integration. The free Viewer 11 and GKB cloud software allow Makkah Chamber to manage and extend surveillance video without license fee. The results are very positive and achieve the requirements of Makkah Chamber's more than satisfactory.
