Location/Building : Kenpoly Manufacture Ltd| Country/City : Nairobi / Kenya
Market/Industry : Manufacture Plant| Related Products : D3622TIRO, GKB D6122

Kenpoly Manufacture Ltd

Background

Kenpoly is a Kenya based plastic appliances manufacture plant. Its product range includes plastic office appliances, office appliances, industrial appliances, and household appliances.

Solutions

High definition surveillance in this project is requested; therefore, GKB proposed GKB D3622OTIR (Outdoor vandal Proof IR H.264 1.3MP IP cam) and D6122 (Outdoor weatherproof 1.3MP IR camera) for this project. This project initially required 14 * HD IP cams to secure its plant and would expand to more cameras in the future.

GKB also supplied NVR10 software, a network video recording software, which the local Kenya partner can install it to a server. The software is capable of recording up to 64 * GKB 3622TIR cameras @ SXGA (1280 * 1024) resolution with 15fps resolution and quality. As a result, if the plant requires more cameras in the future, there is no need to buy extra license.

NVR10 software also has AVI video conversion and snapshot (Single/Multiple channel) function; therefore, the security guards can save the event video and image for backup.

Benefits

Using GKB Diplomat solution is very economical. The free NVR10 recording software allows end users to achieve high definition surveillance solution with minimum investment in recording and storage.
