Market/Industry : Shopping Mall | Related Products : GKB D3622TIR, GKB D6122P, and GKB DZ260

## J Centre Mall

### Background

J Centre Mall is a newly constructed shopping mall and had grant opening early in 2012. J Centre Mall was looking for a high definition surveillance solution, which could separate the recording station and monitoring stations.

### Solutions

In this project, GKB proposed GKB D3622TIR, GKB D6122P, and GKB DZ260. Both D3622TIR and D6122P are 1.3MP H.264 network cameras equipped with 8G micro SD card for back up event recording. DZ260 is GKB 26X optical and 12 digital zoom in network PTZ camera with 8G micro SD card for continuous recording.

GKB provides NVR10 software for recording all network cameras and Viewer11 for client monitoring station. The security guards in with Viewer11 are only connected to NVR10 Server to obtain live view generated from NVR10 Server; therefore, security guards are prohibited to connect to IP cams directly to avoid mis-configuration to the network cameras. Security guards are only authorized to live view and playback NVR10 Server recorded video.

NVR10 Software also provides intelligent playback search such as missing object, foreign object, and motion detected to help the guards locate event video more efficient. The NVR10 also has AVI conversion and snapshot functions that contribute the guards to back up the event video and send to managerial personnel for further investigation.

### Benefits

Using GKB solution is very cost effective. The free NVR10 recording software and Viewer11 client software are free but very powerful. Features in the software are more than enough to what the Mall demands. J Centre Mall just needs to invest sever hardware cost and installs the software. The software is also capable up to 64CH recording and viewing; therefore, there is no additional software license cost to J Centre Mall for future camera expansion.
